Strategic Applied AI and Data Analytics Specialist with 5+ years of progressive experience transforming complex, high-volume datasets into actionable business intelligence and data-driven strategic recommendations. Deep expertise in end-to-end analytics lifecycles—encompassing ETL pipeline engineering, advanced predictive modeling, interactive BI dashboard development, machine learning implementation, and stakeholder-focused insight delivery. Proven track record includes 15% improvement in employee retention metrics, 35% acceleration in enterprise reporting workflows, and successful delivery of analytics solutions across international freelance, institutional, and elite operational environments.

TECHNICAL EXPERTISE

Programming Languages & Databases: Python, R, SQL & SQL Server, ERD Design & Database Architecture
AI & Machine Learning: Predictive Modeling, Deep Learning, Exploratory Data Analysis (EDA), Statistical Modeling & Hypothesis Testing, Agentic AI, Applied AI Solutions
Business Intelligence & Data Visualization: Microsoft Power BI, Tableau, Advanced Excel, Data Storytelling, KPI Development & Automation, Real-time Dashboard Architecture
Data Engineering & Analytics: ETL Pipeline Design & Implementation, Data Cleaning & Preprocessing, Data Governance & Integrity, Big Data Analytics, Data Mining
Cloud Platforms & Development Tools: Microsoft Azure, Git & GitHub, VS Code, RStudio, SSMS (SQL Server Management Studio), Notion, Lucidchart

PROFESSIONAL EXPERIENCE

Applied AI & Data Analytics Trainee | Digital Pioneers Initiative (Digilians) at Ministry of Communications and Information Technology (MCIT) | Dec 2025 – Present | Cairo, Egypt

- Engineered scalable Big Data analytics pipeline utilizing advanced predictive modeling to identify complex patterns across 1M+ daily data points, directly supporting strategic resource deployment decisions and operational intelligence at the institutional level.
- Synthesized technical findings from machine learning, deep learning (CNNs, RNNs, GANs), and advanced exploratory data analysis into clear, actionable strategic insights for executive stakeholders in high-performance operational environments.
- Maintained 100% adherence to strict operational timelines and professional standards within a structured, elite training environment emphasizing technical excellence, data-driven decision-making, and disciplined execution under pressure.

Freelance Data Analyst | Global Freelance Platforms | Oct 2024 – Dec 2025 | Remote

- Delivered end-to-end analytics solutions for 5+ international clients, executing comprehensive data cleaning, validation, and exploratory data analysis on 10,000+ row datasets using Python (Pandas, NumPy) and SQL, enabling faster decision cycles and improved business outcomes.
- Developed the SmartMart Sales Intelligence project within a strict 7-day deadline, transforming raw sales data into an enterprise-grade Power BI dashboard featuring advanced MoM/YoY growth metrics, Average Order Value (AOV) analysis, and time-series sales patterns (hourly/weekday segmentation).
- Architected customized, interactive KPI dashboards that reduced client reporting time by approximately 20% through workflow automation, enabling stakeholders to optimize revenue performance and strengthen data-driven decision-making across business functions.

Business Intelligence Analyst | National Telecommunication Institute (NTI) | Nov 2024 – Feb 2025 | Alexandria, Egypt | Score: 100%

- Completed rigorous 120-hour intensive data analysis program, achieving a perfect score of 100% while mastering SQL, Python, R, Power BI, Tableau, and advanced Excel for enterprise data analytics and visualization.
- Designed and deployed 4+ automated dashboards using Power BI and Tableau, improving organizational reporting speed by 35% through systematic data troubleshooting, targeted KPI development, and optimization of data refresh cycles.

- Applied advanced statistical methods, hypothesis testing, and professional visualization techniques to support data-driven decision-making across organizational departments and operational functions.

Data Analyst Specialist (Internship) | Digital Egypt Pioneers Initiative (DEPI) at Ministry of Communications and Information Technology (MCIT) | Apr 2024 – Oct 2024 | Hybrid | DEPI STAR Certified

- Completed 180-hour government-sponsored advanced technical program, achieving advanced proficiency in SQL Server, Python, R, Excel, Tableau, and ETL (Extract, Transform, Load) processes for enterprise data analytics.
- Orchestrated 3+ end-to-end ETL processes and complete data analysis lifecycles, ensuring rigorous data governance, data integrity validation, and quality assurance from raw data ingestion through final deliverable reporting.
- Developed specialized technical solutions, comprehensive project documentation, and standard operating procedures to streamline data analysis workflows in collaborative, cross-functional team environments.

FEATURED PROJECTS

End-to-End Supply Chain Analytics & Logistics Intelligence System

Technologies: Power BI, SQL, Python, Data Mining | **GitHub Repository:** End-to-End-Logistics-Intelligence-System

- Conducted comprehensive diagnostic analytics on 8,000+ European retail transactions, employing advanced data mining techniques to identify profit leakage points and operational inefficiencies, uncovering opportunities to recover an estimated 12% in lost net profit through optimized pricing strategies and margin management.
- Developed a high-impact Power BI performance dashboard providing real-time visibility into regional profit margins, shipping service level agreement (SLA) compliance, discount-to-profit sensitivity analysis, and cross-border fulfillment performance metrics.
- Recommended and modeled a tiered shipping optimization strategy and inventory decentralization approach for regional distribution hubs, designed to reduce fulfillment latency, minimize cross-border delivery delays, and improve overall supply chain efficiency.

HR Analytics: Employee Retention & Workforce Intelligence

Technologies: SQL, Python, Excel, Power BI | **GitHub Repository:** HR-Analysis

- Applied advanced statistical analysis and exploratory data analysis (EDA) to a 500+ employee dataset, pinpointing key attrition drivers, department-level turnover patterns, and performance correlation factors that were directly impacting organizational retention metrics.
- Built interactive, executive-facing Power BI dashboards for HR leadership, featuring department-level attrition hotspots, individual performance indicators, compensation analysis, and employee satisfaction correlations enabling data-driven decision-making.
- Analytical insights directly informed HR retention initiatives and policy adjustments, contributing to a measurable 15% improvement in overall employee retention and reduced turnover costs.

EDUCATION

Bachelor of Business Administration (English Section)

Damanhur University, Faculty of Commerce | Oct 2016 – May 2020 | Egypt

PROFESSIONAL CERTIFICATIONS

- **Google Data Analytics Professional Certificate** | Google (Coursera) | Apr 2026
- **IBM SkillsBuild Certified Data Analytics Specialist** | Education for Employment (EFE-Global) | May 2025
- **Data Analytics and Visualization Specialist** | Sprints & National Council for Women | Jun 2025
- **Data Analyst Freelancer Certification** | ITIDA (Information Technology Industry Development Agency) | Apr 2025
- **AI & Machine Learning Specialist** | Ministry of Youth & Sports (Shabab Muhtakir) & Huawei | Feb 2025
- **Data Analytics Bootcamp (3-Month Intensive Program)** | Analyst Builder & Alex the Analyst | Mar 2024

LANGUAGES

- Arabic: Native Proficiency
- English: Professional Proficiency (Technical Documentation, Business Communication, Cross-functional Collaboration)
